

Eyeline[®] Frame projection screens

Projection format

Available in Video 4:3, Widescreen 16:9 and 16:10 formats.

Material & borders

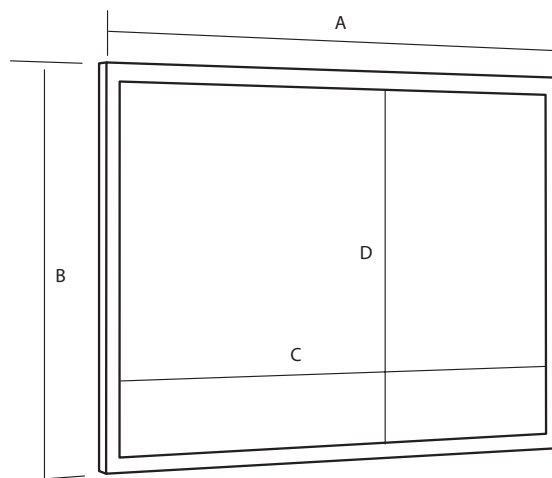

100mm wide frame is covered in black velvet to ensure there is no reflection from the projection source. Matte white projection surface is held to frame by springs ensuring a flat image at all times.

Installation

Follow instruction for easy frame assembly and attach the projection material to the screen with the springs provided. Frame is easily attached to wall using wall brackets provided.

These competitively priced velvet covered frame screens are ideal for many environments including Home Cinema, Board rooms and Lecture theatres.

12 month guarantee.
