

Eyeline® frame screens

Semi permanent, always in view screens for dedicated areas such as board rooms, conference rooms, training and home cinema rooms

- Velvet covered aluminium frame is 8cm wide and supplied in sections to fix together with ease
- The screen fabric is tensioned and fitted to the rigid frame giving a superior flat surface
- Velvet covered screens have the benefit of a non-reflective, light absorbing surface that increases the perceived contrast of the image
- Available in a wide range of sizes in video 4:3, widescreen 16:9 and 16:10 formats.

Bespoke screens

A wider range of fixed frame screens for front and rear projection are available - please ask your representative for further details.
